Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/576,707	Applicant(s) MAXIMUS ET AL.	
	Examiner William C. Dowling	Art Unit 2878	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 51-61, 63-64, 66-68, 70, 72, 74, 76, 78, 80, 82, 84, 91-92 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/5/09.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 62, 65, 73, 75, 77 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 62/41 has no proper antecedent for plural "projection devices".

Claim 73/71 has no proper antecedent for " the at least two projection devices".

Claim 75/73 has no proper antecedent for " the at least two projection devices".

Claim 77/73 has no proper antecedent for " the set of filters".

Claims drawn to the use of plural projection devices are consistent with the non elected invention.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2878

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 41-44, 50, 71,85, 87-90 are rejected under 35 U.S.C. 102(e) as being anticipated by Divelbiss et al. (7,180,554).

Divelbiss et al. 97,180,554) disclose a stereoscopic projection apparatus comprising:

At least one filter (for example See figure 30) formed of a plurality of colored filters on a rotating wheel and having spectral characteristics such that light for forming images for left and right eyes are sequentially transmitted through the filter thereby "compensating for color difference in the left and white images.)

Means for rotating the color filter in a synchronized manner with the images formed on an image modulator.

As noted in column 32 Lines 33-57, passive or active type LC polarizing glasses are provided for viewing the images.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 83 is rejected under 35 U.S.C. 103(a) as being unpatentable over Divelbiss et al.

Art Unit: 2878

Divelbiss et al discloses the structural limitations of the claims but does not teach the use of multiple devices.

It would have been obvious to one skilled in the art to provide duplicate projection structures in order to obtain a larger composite display, as is known in the art.

Allowable Subject Matter

8. Claims 45-49 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
